

TECO Electronics AS
- Quality Without Compromise

Your local service provider.

Use the opportunity to save time and money, do your service in our backyard.

Located in the heart of east-cost Norway, we cover the area from Oslo to Kristiansand within a short driving distance.

We know marine service and now offer local service rates.

With our well equipped service workshop close by, most electronics can be repaired before vessel leaving port. During our 20+ years of operation we have established a close network to different service providers, allowing us to extend our business.

Our competence is not specific to one maker. We see the system integration as one solution.
