

TECO Electronics AS
- Quality Without Compromise

TECO ELECTRONICS TOP SELECTED SERVICES

- PCB REPAIR

TECO Electronics AS is specialized in repairing printed circuit boards (PCB). We repair and recondition equipment from most international manufactures. Old existing automation systems often suffer from lack of spare parts and know-how from the manufacturer.

TECO Electronics have many years of experience in troubleshooting and performing service on these systems. We have a wide range of old and obsolete components, ready to serve your electronics.

Our expertise includes: Lyngsø, Terasaki, Macon, Norcontrol (Kongsberg), Autronica, Aconis, Selma, Alfa Laval, Westfalia, Graviner, NEBB and many more.

- Noris IAMCS, retrofit for marine and offshore

TECO Electronics AS has for many years supplied turn-key solutions for the maritime- and offshore market. Fast and simple system configuration via modular system architecture. It is extremely robust and insensitive to interference. The modular system architecture makes the system highly suitable for small vessels as well as for large ships.

A unique possibility is to retrofit one, or a few vessels in your fleet. Then you will benefit from being able to use the old system as spare parts for the rest of the fleet. TECO handles everything from removal of the obsolete system, installation of the new, to overhauling and storage of spare parts ready for re-use. Many references available.

- TEST EQUIPMENT: Pressure-, temperature, electrical calibration- and test equipment.

TECO Electronics AS supplies a great variety of calibration and test equipment to meet the regulation of SOLAS. We use only high quality equipment for the best possible user interface and extended life span. Instruments are carefully selected by TECO, together with the customer, to ensure all needs are covered.

We supply both standardized and customized suitcases, for keeping all the certified test equipment gathered and protected.

We perform calibration of instruments in Norway, Benelux and Singapore. Contact us for a customized rotation solution for your fleet, taking advantage of our many years of experience.

We offer the TECO TBS2, a complete calibration suitcase with 2 year calibration interval

- TECO Maritime Group

TECO Maritime Group supplies technical products and services to the maritime, offshore and land based industries. TECO Maritime Group's objective is to be the preferred, and most reliable, provider of technical products and services within our areas of operation. Know-how, quality and personal service, combined with a dedicated staff, are vital factors to achieve our objective. TECO Maritime Group operates a highly skilled, motivated and service minded workforce. Currently TECO Maritime Group has offices in Norway, Poland, The Netherlands, USA, Canada, Singapore and the U.A.E.

- TECO Electronics, a world-wide supplier of service

Your fleet might not be trading in just one area. We keep track of your vessels and can supply service world-wide. To be able to offer that we have offices, with workshops and service engineers, in strategic locations:

- ~ Porsgrunn, Norway (Head office)
- ~ Singapore

- KROHNE Skarpenord, service partner

Teco Electronics AS - approved service partner for KROHNE Skarpenord. KROHNE Skarpenord offers a complete product line for all types of ships. The tank level gauging products have been installed on almost all types of ships, giving an unbeaten know-how in the field of marine tank-monitoring.

- Honeywell, Enraf, service partner

Teco Electronics AS - approved service partners for Honeywell Marine (Enraf Auxitrol). Honeywell offers precision level measurement solutions which include: fixed systems for cargo management, radar gauges for cargo tanks, level and safety alarm systems, sensors, HERMeTic portable tank gauging products, thermometers, valves and accessories.

- GASBAL, Fixed gas detection from Enraf

TECO Electronics AS cooperate with Enraf (by Honeywell) on stationery gas detection. The GASBAL™ system is designed to detect and analyse gas concentration in confined spaces such as ballast tanks, voids or dry spaces. The system scans each input and activates an alarm if the gas concentration is over the pre-set value. This gas detection system can be installed on board tankers, OBOs, offshore vessels and rigs. TECO Electronics have, for many years, serviced fixed gas-detection from many makers.

We perform inspection, calibration, repair, or even retrofit of old gas detection systems.

- Monitors from KME UK

TECO Electronic AS are specialized in supply of various types of monitors. Many older systems onboard vessels contain a monitor. Monitors are often very hard to get, or quite expensive to buy, directly from the system maker. We have long-time experience in supplying the correct types of monitors, and at a favorable price. We perform repair of obsolete CRTs, as well as sale of replacement monitors.

- Bridge Remote Control, service partner for retrofit

TECO Electronics AS offers turn-key retrofit solutions of Bridge Remote Control Systems. By use of our highly qualified and experienced Service Engineers, we can execute retrofits whilst ship is in service, or during dry-docking. We aim at being flexible in order to avoid off-hire costs for our customers.
